

The Alternative Versions

This set consists of 1 Forecast and 1041 Suspense recordings. There are a total of 945 Suspense programs broadcast.

The **Main folders** contain 833 Network Programs, 35 AFRS programs and 44 AFRTS programs. There are 35 Missing Programs and 3 Messages.

The set also includes 130 **Alternative versions** which consist of 19 AFRTS Reissues, 59 AFRS recordings, 1 AFRTS recording, and 51 Network recordings.

When selecting a recording for the set, a **Network** version was always preferred if it were about of equal or better sound quality compared to the AFRS/AFRTS version. Whichever recording was deemed of best quality was placed in the **Main Folder**.

Alternative versions are usually AFRS or AFRTS recordings, or poor sounding network recordings. If the network version was of clearly inferior sound, it was placed in the Alternate Folder and the better sounding copy – AFRS or AFRTS – placed in the main folder. Other alternative versions may be an aircheck, or something unusual or distinctive about this version [war news, a special announcement]

The **Alternative versions** are placed in the **Alternate folder** on the same CD as the primary version.

All **AFRTS Reissues** were placed in an **AFRTS Reissue Folder** on the same disk as their corresponding primary file.

Suspense 420902 011 The Hitch-Hiker (128-44) 24543 25m50s AFRTS	AFRTS Reissue Folder
